

Fulton County FY2012 Water Rankings

Project Number	Applicant	Project Title	Regional Ranking	County Ranking	Total Points	Project Cost	Committed Funds	Project Description
WX21075005	City of Hickman	WTP Rehab	6	1	49	\$900,523	\$5,000 HB608	The City of Hickman will need a complete rehab of the existing water treatment plant to handle any kind of growth. The city will also require new water pumps for the system. The water towers in the City of Hickman will need to be upgraded in order to help supply more people with potable water, improve water pressure, and provide a better quality of water to the citizens of their community.
WX21075002	City of Fulton	Demolition of Old Clear Well & Degasifier	13	2	40	\$386,000	\$0	This project will consist of demolishing the old clear well and the degasifier that is on the old clear well that sits on the water plant property. Also City of Fulton will be adding a new degasifier to the new clear well that has been built.
WX21075004	City of Hickman	FMWS Interconnect	32	3	33	\$125,112	\$0	The two water systems in Fulton County have a large gap between them along KY 94. This connection needs to be made to help both systems supply water to more people and also improve the quality of the water.
WX21075006	City of Hickman	Loop From KY 311 to KY 94	38	4	29	\$74,880	\$0	For service delivery purposes, the Hickman system needs to loop from the intersection of KY 311 and KY 94 to Olney Johnson road. In addition, the lines need to be extended from KY 94 to KY 1282 along Joe Parker road. These connections are necessary to help cure the pressure problems that currently are being experienced in this area. These connections will also supply water to 10 new customers.
WX21075003	City of Fulton	South Graves Interconnect	37	5	29	\$65,572	\$0	The FMWS needs to connect with South Graves Water System along US 45 in order to fill the gap between systems and also to provide back up assistance for either system.
